

A Holonomic Model of Transcendence

by Juliet & Jiva Carter

*"The Template - A Holonomic Model of Transcendence"
links Sacred Ceremony, Sacred Geometry, brain chemistry,
bio-circuitry, the endocrine system, neurobiology, DNA, the
archetypal arena and the morphogenetic field to reveal the
holonomic systems of creation that birth and bind
the Human hologram.*

*The workings of The Template model of transcendence encompass
a design and progression that is in total resonance with the vibratory
infrastructure of the primal creation code, a mirror frequency that
duplicates the synchronomic systems that govern all of existence,
honouring the Human as a fractal component in symbiotic resonance
with not only its mother bio-system the Earth, but also
the solar/galactic/universal holography.*

*The energetic nature of consciousness that fosters all life
is integrated by the Human heart/body/mind via the bio-circuitry.*

*This circuitry is the delivery system that integrates
the 'Source Intelligence', translating this energetic electromagnetic
life - force into the bio-informational Human matrix.*

*Originally this Workbook was compiled as a companion
for The Template Ceremony initiate and as a training tool for the
Ambassadors. However it will provide a far-reaching body of
supportive information for those drawn to understand the higher
physics of creation in order to make informed vital choices
and decisions in this age of transformation.*
